

# From Data to Dashboard:

## *Inclusive and integrated approach to substance use and mental health issues in Hawaii*

### Objectives

- Describe data sources that can be used to examine polysubstance use and where to find them
- Identify databases that include co-occurring disorders
- Be able to assess for and identify potential linkages that could be used in each state
- Be able to describe the limitations and/or challenges in collecting these data and how to overcome them in a way that allows for linkage opportunities

**Thursday, August 4, 2022**  
**3:30 pm EST [9:30 am HST]**
