

Master's in Asian International Affairs

NEW!

Asia looms large in global affairs.

It is home to almost 60% of the world's population, accounts for over a third of global GDP, and boasts some of the most dynamic economies in the world. Asia leads the world in the pace of urbanization and poverty alleviation, but remains home to two-thirds of the world's poor. Its middle class is expected to grow from 50 million to 3 billion by the year 2030, creating new consumer demand, new political imperatives, and unprecedented challenges for the natural and human resources of the world.

Governments, businesses, educational institutions, non-profits and others seeking to engage with Asia or Asian issues need professionals who have a dynamic understanding of Asian perspectives, be it in diplomacy, advocacy, public policy, international trade, or military cooperation.

The MAIA degree is designed for working professionals whose careers would be enhanced by a deeper understanding of contemporary Asia. The program addresses issues of global and regional significance—such as security, trade, environment, human rights, and regional cooperation—through a deeper understanding of the domestic and regional factors that shape the actions of stakeholders from the Asian region.

NOW ACCEPTING APPLICATIONS! ▶ ▶ ▶
