

2018 Congress Giving Back to 4-H Project
Taylie O.
Busy Bee Buddies 4-H Club
Kona, Hawaii

For my giving back project, I partnered with Konawaena Elementary Schools robotics team, Robocats. I mentored them when they met for practices after school once a week from October 2018 to February 2019. I helped them prepare for their judged interviews, which was a big part of

their January meet. I worked with each of the six teams by asking them multiple questions about their robot and giving them tips on how to better themselves with public speaking. I

was able to develop a bond with these students and connect with them. I invited them to do a robotics

presentation at our Kona 4-H Federation Demonstration Day in February. Not only was I able to introduce them to 4-H but it also gave them the

opportunity to showcase their robot and practice their public speaking in front of a bigger audience. One of the teams who participated in the 4-H Demonstration Day qualified for states and won the “Create” award. Their robotics coach and judges at states were very impressed with their ability to answer the judges' questions.
