4-H Photography Club March Newsletter 2021

March Focus: Composition

Are you ready to explore new ways to compose pictures? We will practice the "rules" invented to help make off-center compostion work well: the Rule of Thirds, the Golden Triangle and the Golden Rectangle.
These rules have something in common; they help draw the veiwer's eyes into the composition. These basic rules are called design principals. These rules are based on mathematical principles, but you can still producegreat photos without using these "rules." Keep in mind that you can also easiliy use editing tools to test these rules. Composition is important, and you can use your own ideas about what is most pleasing to you!

March Schedule

Every Wednesday at 3pm- Activity Released on Google Classroom
Second Wednesday of the Month at 3pm- Activity Meeting on Zoom
fourth Wednesday of the Month at 3pm- Leadership Meeting

March 31- Capture a Candid Photo

Your Photo Logo

In our February activity meeting, we discussed logos and we challenge ourselves to make our own personal logos for your photography. We saw a demonstration on using canva.com to make easy logos. We will share our logos at the March activity meeting.
