

RAT LUNGWORM

For more information, visit:
<http://manoa.hawaii.edu/ctahr/farmfoodsafety/rat-lungworm/>

Angiostrongylus cantonensis

PREVENTION:

- 1. MANAGE** rat, snail, & slug population with a pest control program
- 2. REMOVE** snails & slugs by hand-picking w/ gloves, setting traps, & removing hiding places
- 3. COOK** hosts (snails, prawns) properly before consuming **internal temp 165°F**
- 4. RINSE & RUB** produce to remove snails, slugs, slime & any nematodes
- 5. CLEAN & SANITIZE** food contact surfaces to prevent cross-contamination
