The University of Hawai'i at Mānoa promotes "living aloha" by encouraging the practice of being considerate of each other and sharing our valuable resources.

UH Mānoa acknowledges the advantages associated with the use of non-motorized vehicles (bicycles, skateboards, etc.) as a means of convenient and efficient campus transportation. The following initiatives have been identified to ensure the welfare and safety of our campus community engaged in mixed modes of transportation and to promote a pedestrian-friendly campus:

**SHARROW LANES**

"Sharrows" are pavement markings indicating a traffic lane shared by motorists and bicyclists. In a shared lane, bicyclists should position themselves appropriately away from parked cars, passing other cyclists, avoiding potholes, etc. in the same direction as traffic. Motorists should slow down and pass with care if bicyclists are present - Drive and Bike with Aloha.

To negotiate these forms of transportation are expected to use them in a safe, responsible manner, giving pedalcyclists the right of way at all times. Excessive speed, stunt riding, crossing the road, weaving, and knee pads.

Motorists: should always wear appropriate safety gear - helmet, elbow, wrist, and knee pads.

- **Be aware of others around you.**
- **Look both ways before crossing roadways,** and make eye contact with the driver when vehicles are present - ensure the driver sees you before crossing the road.
- **Be visible.** Use reflectors and bright clothing at night.
- **Yield to motor vehicles,** even when you have the right of way.
- **Never hitch a ride from a car, bicycle, etc.**
- **Look out for holes, bumps, rocks, etc. while riding.**
- **Look both ways and make sure it is clear before crossing roadways, intersections, and parking areas.**
- **Never ride your skateboard on a public roadway,** not only is it illegal, but also very unsafe.
- **Be visible.** Use reflectors and bright clothing at night.
- **Dismount from the moped,** and walk to your destination.
- **Be considerate when parking your bike.** Do not block or interfere with pedestrian and vehicle movements.
- **Ride as an ambassador of cycling.** Ride responsibly, safely, and courteously.

**BICYCLES**

- **Select an appropriate skateboard for your skill level.**
- **Wear appropriate safety gear - helmet, elbow, wrist, and knee pads.**
- **Learn how to fall to reduce serious injury.**
- **Never hitch a ride from a car, bicycle, etc.**
- **Look out for holes, bumps, rocks, etc. while riding.**
- **Look both ways and make sure it is clear before crossing roadways, intersections, and parking areas.**
- **Never ride your skateboard on a public roadway,** not only is it illegal, but also very unsafe.
- **Be visible.** Use reflectors and bright clothing at night.
- **Dismount and walk your wheels.**
