

Academic Year Residential Learning Programs

Academic Year 2018 - 2019 Residential Learning Programs

One of the ways to enhance your on-campus living experience is by being a resident in a Residential Learning Program. Student Housing Services is partnering with academic departments and/or campus resource offices to establish Residential Learning Programs that foster a greater connection between the in-class learning experience and the out of class experience. Research has shown that residential learning experiences provide positive impacts on student satisfaction, connection to the university and academic performance. Ultimately, we believe these communities can help you develop long lasting connections while also focusing on your academic aspirations.

Students with similar majors or interests will live together on selected residential floors. Residents will be able to study together, work together and learn from each other. Hall staff will focus programming elements to connect classroom learning with your out of class experience. Specific activities may include:

- Social programming focused on bringing students and communities together
- Inviting faculty or outside practitioners to the halls for events, lectures or community programs
- Study, tutor or advising sessions presented by department staff or students to aid students in their academic pursuits
- Programming focused on experiential learning such as film series, cultural experiences and off-campus excursions

Specific Program Information

Rainbow Village

Where gender is not taken into account when assignments are made ? is located in International Gateway House, Diamond Head Side, 3rd and 4th floor. This community is intended to be a supportive environment for students who identify as lesbian, gay, bisexual, transgendered, or allies of LGBT students.

E?: College of Engineering Residential Learning Program

E?: Acknowledge your calling and be a part of the Engineering ?Ohana, which is a residential learning program designed specifically for first time freshmen pursuing a degree in Engineering. Students majoring in Engineering will find their niche while living together in an engineering student community within Johnson Hall, conveniently located across the street from Holmes Hall, home of the College of Engineering. As part of the residential learning program, students will be engaged in a variety of academic

and social networking activities led by UHM College of Engineering faculty, staff, and student leaders. Through these activities, students, as a community of learners, can overcome any obstacles they may be facing together as new students; will have the opportunity to learn about the different areas of engineering; discover their academic focus; and connect with other engineering students and faculty who share their interest.

E? is a Hawaiian word (pronounced as ?eh-oo?) that has two meanings: 1) you acknowledge a thought, call, or a request AND 2) to win, to overcome, to conquer.

Where is it housed in 2018 - 2019? [Johnson Hall](#) ^[1]

Special Environments

Freshmen only environments exist in all four Hale Aloha towers.

The *Graduate and Family Housing* environment is located in Hale Wainani ?G? building.

Limited Co-Ed housing is available at Hale Wainani. Residents of all genders will share living quarters in this community.

Who can be a part of the Residential Learning Programs?

A student can be a part of any program that is housed within a facility in which they are qualified to reside, unless otherwise indicated above.

How to apply for Residential Learning Programs

Applying to be part of a Residential Learning Program is easy! For every program except the Honors RLP, simply select the program on your housing application.
