Computer Power Saving Program

Lance Akana
IT Specialist

UNIVERSITY
of HAWAII®
MĀNOA

Initiative

Energy consumption/cost cutting by reducing the amount of electricity being used by computers through the use of power monitoring software.

Power Management Software

- Faronics - Power Save
- GreenPacificIT - Verdiem

How They Work

- Main software installed on a centralized server
- Client software installed on individual workstations
 - IT installed
 - User installed
- Client software reports computer state to the server
 - Computer on/off
 - Idle threshold
 - Work Day/Night/Weekend Schedules

OFG Pilot Program

- UH ITS
 - Osamu Makiguchi
 - Byron Watanabe
- OFG Progress
 - Server software installed/running
 - Client software installation in progress
 - Data collection in progress

Promotion

- Mānoa Sustainability Corps
- Sustainable UH
