HON 333: (002) Experiential & Scholarly Engagement (CRN: 94178)
Focuses: OC (Oral Communication) & WI (Writing Intensive)
Online, asynchronous
Instructor: Dr. Jayme Scally
This course is largely focused on helping you to realize the many different ways you learn in your everyday life, and how learning is not (and should not) be restricted to formal learning environments like a classroom. Students develop an understanding of the theory and practice of experiential learning through direct engagement and focused reflection. We will reflect upon how you communicate your skills and experiences in diverse environments, including an opportunity to interview a student abroad and developing mock job application materials.
