

Activity Map – College of Engineering Student Academic Services Office

Activity	1) Students identify the engineering major they are interested in pursuing and understand the 4 year plan (available on the check sheets) to complete that engineering degree.	2) Students identify educational and career interest/goals and learn about the project experiences and other resources that the college has to offer that can help them develop those interests and goals.	3) Students take ownership of their academic plan by filling out their tentative plans on their advising forms before meeting with the advisors each semester.
