

**Table 3.14.** Features of tunicates and humans in phylum Chordata

| Feature                           | Phylum Chordata                  |                              |
|-----------------------------------|----------------------------------|------------------------------|
|                                   | Subphylum Urochordata (Tunicate) | Subphylum Vertebrata (Human) |
| Skeletal System and Locomotion    |                                  |                              |
| Feeding and Digestion             |                                  |                              |
| Nervous System and Sensory Organs |                                  |                              |
| Habitat and Lifestyle             |                                  |                              |
| Reproduction                      |                                  |                              |
| Circulation and Gas Exchange      |                                  |                              |
