Comments on the Composition of the Files

Each file has one file serial number. The file serial number starts from 1 and ends at 1393. The file serial number continues regardless of changes in box serial number. The file serial numbers are printed at the left side of the file lists.

Each file box contains several files and has its own serial number. The box serial number starts from 1 and ends at 87. The box serial numbers are printed in the upper righthand corner of each page. The files listed on each page are contained in the box numbered in the upper righthand corner of that page. When the box serial number changes in the middle of the page, the files below the new box serial number are contained in the box with the new serial number.

The numbers printed in the lower righthand corner of each page are the page numbers of this printed list. They have nothing to do with the box or file serial numbers.

Information cited in square brackets has been supplied by the archivist and is not contained in the documents themselves. The files with file number in square brackets in "Writings by Shannon McCune" section stand for those files for which the identity of author is surmised to be Shannon McCune by the archivist.

When the name of the author, publisher, or producer of an item is not in English, French, or German, or when the title of a book or periodical is not in English, French, or German, it is transliterated in English. When the title of an article is not in English, French, or German, or when the producer or publisher of an item is an official organization in any country, it is translated in English. But the Chinese, Japanese, or Korean titles of the maps, filmstrips, and slides are printed in their original language in this list.

The dates of the documents, especially maps and articles printed in East Asian countries that use era, are converted to Gregorian calendar dates.
