LumiSight UH: Day of your visit

So you have made your account on LumiSight [link], uploaded your vaccination record, and had it approved—thank you! Now let’s review what Lyon Arboretum needs from you the day of your visit.

Open the LumiSight app. It should look something like this.
You will need to **scroll down** until you see the golden **button** that says, “Check your symptoms”
When you click the “Check your symptoms” button, it will give you a long question about if you are experiencing any symptoms, recent potential exposures to COVID19, etc. Scroll down to the bottom to answer the question honestly.

Top of this panel. Scroll down to the bottom to see...

...The bottom of this panel where you can input your answer.
If your answer is no (no symptoms or exposures), and if your vaccination record is approved, then you should see a page that looks like this. Notice it has the date on it. You can use this screen to verify your COVID19 safety status when you arrive :)
You can also see a record of all your check-ins on the main, home page. (It will be way down on the page, under your on-campus check in, your “check your symptoms” option, your vaccination history.)

It will have a date on it. You can also use this to verify your COVID19 safety status when you arrive :)

We need to see today’s date for it to be valid for your visit.
