UH Mānoa Graduation Rates Analysis

The graduation rate is the percentage of students in a given cohort who graduate within a specified period of time. According to the federal government’s data collection system — the “Integrated Postsecondary Education Data System” (IPEDS), college students’ graduation rates are measured based on the first-time, full-time freshmen cohort, which is formed by incoming undergraduate students who attend college for the first time (no prior college experience) and have a full-time credit load during their first semester. In higher education, the 4, 5, 6, and 8-year points are typically used to measure a first-time, full-time cohort’s graduation rate.

The following graph shows rapid growth in 4-year graduation rates among first-time, full-time cohort students at UH Mānoa. From years 2010 to 2019, UH Mānoa’s 4-year graduation rate increased significantly from 17.5% (cohort 2006) to 36.6% (cohort 2015) in 9 years. To be specific, 17.5% of first-time, full-time cohort students who entered UH Mānoa in fall 2006 earned a bachelor’s degree within 4 years, whereas 36.6% of first-time, full-time cohort students who entered UH Mānoa in fall 2015 earned a bachelor’s degree within 4 years. A significant higher graduation rate indicates a rapid rise in students graduating on time.

The 5-year graduation rate has risen from 44.6% in 2011 (cohort 2006) to 57.4% in 2019 (cohort 2014) - a total of 12.8 percentage points, or a 28.7% increase in 8 years. The 6-year graduation rate shows a slight increase of 4.8 percentage points from 2012 (cohort 2006) to 2019 (cohort 2013), or a 8.6% of increase. The 8-year graduation rate increased from last year’s 62.2% to this year’s 63.3% (cohort 2011).
To put UH Mānoa’s graduation rates in perspective, peer institutions’ graduation rates are provided using IPEDS’ 2018 Data Feedback Report (DFR). Figure 16 of the DFR report provides the median graduation rates (cohort 2009) of UH Mānoa’s 9 peer institutions. According to this report, the median of peer institutions’ 4-year graduation rates is 34%, the 6-year graduation rate is 61%, and the 8-year graduation rate is 63%. The following graph shows UH Mānoa’s 2009 cohort (same cohort as the peers’ data) as having an 21% 4-year graduation rate, a 57% 6-year graduation rate, and a 63% 8-year graduation rate. As shown earlier, UH Mānoa’s current graduation rates for 4-, 6-, and 8-years are 36.6%, 60.5%, and 63.3% respectively.

For readers’ information, UH Mānoa’s peer list was created in 2012 and has been used in the IPEDS Data Feedback Report for peer analysis. MIRO’s analyst used cluster analysis and IPEDS data to identify 9 peer institutions. Click here to review the method used to identify peer institutions.
