

Native Hawaiian Place of Learning Measurable Goals

From the UH Mānoa strategic plan, [Mānoa 2025: Our Kuleana to Hawai'i and the World](#)

By 2025 we will have accomplished the following:	Reason(s) why this goal is necessary
A data and evaluation system will be created that maps and measures campus and college-wide progress in each of the four NHPoL strategic focus areas;	While we have 4 NH reports with hundreds of recommendations, we currently have no way to track and measure progress with regards to those recommendations.
100% of deans and other executive managers will possess and utilize a common knowledge set of key data points regarding each of the four NHPoL strategic focus areas;	Convergent leadership (Kezar, 2018) requires students, staff & faculty to work in partnership with executive administration. Often, however, especially as it relates to becoming a NHPoL, executives do not have the baseline understanding and knowledge to engage and support in meaningful ways.
100% of schools and colleges and other similar nonacademic units will have a five-year strategic plan to address each of the four NHPoL strategic focus areas relevant to their particular units.	Each school/college is at a different point along a continuum of becoming a NHPoL. Therefore, it is best for each unit to utilize the NH reports as starting points and to take into consideration their unique data and contexts.
